

Kyle Foster

Senior Developer

Wills Point, TX | fosterkyle6456@gmail.com | (469) 410-5286 | kyle-foster.com | github.com/Foscat | linkedin.com/in/kylefoster-dev

PROFESSIONAL SUMMARY

Senior Developer with 6+ years of experience building React applications, browser-based tooling, role-based product systems, and custom web platforms. Strong in frontend architecture, reusable UI systems, responsive design, accessibility-minded interfaces, and practical product delivery across education, creator platforms, admin dashboards, and service-based web products.

PROFESSIONAL EXPERIENCE

Senior Developer | Sanderson Technology Enterprises | Remote | 2025 - Present

Develops custom web platforms, marketing sites, admin tools, and digital business systems for creator-focused brands and independent clients.

- Built the company web presence as a clean, SEO-focused business site with service positioning, brand assets, responsive layout, theme support, and static deployment readiness.
- Plan and implement creator-owned platform concepts including branded websites, private content systems, member-access areas, CMS workflows, admin dashboards, and storefront foundations.
- Create reusable frontend patterns using HTML, CSS, JavaScript, React-ready architecture, ui-style-kit-css, and interactive-surface-css.
- Own technical scoping, information architecture, implementation planning, documentation, testing checks, and maintenance strategy.
- Translate business needs into practical requirements balancing brand control, scalability, performance, accessibility, and maintainability.

Senior Frontend Engineer | CodeStream Studios LLC | Remote | 2019 - 2025

Served as the primary frontend engineer for CodeStream Online Studio, a React-based learning platform used by students, teachers, and administrators.

- Architected a browser-native coding platform with lesson rendering, project editing, three-panel IDE workflows, live preview, and in-browser execution.
- Built classroom, organization, licensing, and grading systems supporting admin, teacher, and student experiences through role-based UI and workflow design.
- Developed reusable component patterns for content rendering, responsive navigation, documentation UX, and maintainable feature delivery.
- Integrated cloud-backed project persistence so users could save, review, clone, grade, and continue work across sessions and devices.
- Used real classroom feedback to improve workflow clarity, usability, and feature design.

SELECTED TECHNICAL PROJECTS

CSS Library Systems - Interactive Surface CSS / UI Style Kit CSS

- Published reusable CSS systems for accessible interactions, theme palettes, design tokens, and polished interface delivery across static and application UIs.

Portfolio System - kyle-foster.com

- Built a CMS-style React portfolio architecture with reusable page/section rendering, responsive navigation, rich text rendering, diagrams, and case-study presentation.

Daimler Truck Hackathon Winner - Voice-powered technician assistant

- Helped build a hands-free repair workflow prototype using voice interaction, structured guidance, and backend-driven step retrieval; selected winner among 20+ teams.

TECHNICAL SKILLS

Frontend

React, JavaScript (ES6+), HTML5, CSS3, responsive UI, RSuite, Vite

UI Architecture

Component architecture, design systems, Context API, state modeling, accessibility, navigation systems

Platform Systems

Role-based systems, content rendering, browser-based IDE workflows, admin dashboards, CMS workflows

Backend / Services

Node.js, Express.js, REST APIs, MongoDB, Mongoose, AWS S3, AWS Lambda

Workflow

Git, GitHub, debugging, testing, technical documentation, product planning

EDUCATION

SMU Coding Bootcamp | Southern Methodist University | Dallas, TX | 2019

Full-Time Coding Bootcamp | Tech Talent South | Dallas, TX | 2019
